

Ryou

This was the first settlement on [Daichi](#), and the team named it Ryou which means *hostel, dormitory*. Ryou was built on the shores of the [Himiko Sea](#). The start of the colony consisted of a large collection of [Collapsible Rapid Deployment Modules](#). Initial construction supplies and provision were supplied by the [YSS Tsuiken](#) and [YSS Sapurai](#). Since the colony site was fairly temperate they chose to build houses reminiscent of the Shoin-style. Colonization is scheduled to take place in three phases.

Development

The center of the settlement was three community structures, built in a 🏯 [Shinden-zukuri](#) style. Surrounded by Shoin-style houses, with modern amenities blended in. For the initial buildings lumber was harvested on the surface and transported by Tansaku to the [Sapurai](#). On the [Kisaki-class Starbase](#) the lumber was processed into prefabricated pieces. Then shipped back to the surface for construction. Upon completion of Phase I the [Kisaki-class Starbase](#) moved to their designated locations. The colony found several species of fruit safe for consumption.

For Phase II of the colony construction a planet side lumber mill was constructed. This phase was not only an expansion of the population but a start of production. Large farms semi-automated will be developed to grow rice, beets, and potatoes. A fish farm is to be established to produce genetically engineered fish, along with careful fishing operations of native species. A small cattle farm is to be established as well. Phase II has a target population of 10,000, and is planned to take three months. During this phase a series of [H Bunker](#) will be constructed for the safety of the population.

Phase III of the Colony saw an influx of colonists from [Yamatai \(Planet\)](#), the inclusion of several other facilities.

Production

The colony currently products the following items:

- Produce
 - Rice, potatoes, beets, Sake, fish, fruit
- Materials
 - Wood, refined ores.

Population

Population: 5,295,000 Up from 1,525,000 due to induction of Refugees.

Demographics

Species	Number
NH-22C Yamataian	1,500,000
Nekovalkyrja, Type 33	1,750,000
NH-29	25,000
Elysian	20,000
Jiyuuian	2,000,000

Facilities

An [SSS Campus](#) was established based on the design of the original.

A [Community Backup Center](#) is present at the center of the government complex.

Transportation

Staging Area

After completing the initial development a [Tansaku Staging area](#) similar to the on on [Yamatai \(Planet\)](#) was created.

Rail System

Twin tunnels were dug using [M.O.L.E.S. - Mineral Ore Location and Extraction System](#) running from Ryou to [Fort Shotou](#). Excavation took 60 days. Two [Type 32 Rail Train](#) has been put in place providing transport between Ryou and [Fort Shotou](#).

Completed of expansion of the rail system has begun with tunnels being made to [Bakufu](#) and [Joukai](#).

Bus Service

In [YE 34 EM-K6 "Kouteki" Grav-Bus](#) service was added to the city, and limited service to the other cities.

Monorail

At the end of [YE 34](#) work began to install a [EM-K7 - Monorail](#) system, with [EM-K7 - Monorail Stations](#) throughout the city. It connects to the long distance rail system already in place.

PAINT

Ryou is part of the [PAINT](#) mass transportation system and has a terminal operated by the [Star Army of Yamatai](#). It has a flight to [Amatsu-Yamatai, Yamatai \(Planet\)](#) every two hours.

Businesses

- [VCE Cafe](#)
- [Warm and Sweet](#)
- [Ramen To Go](#)
- [SYNC](#)
- [Kagayaki Cosmetics Day Spa](#)
- [Trinary Star Shipping](#)
