

# Hyoutan

Hyoutan is an Ice Giant in the [Gensou System](#), it is part of the [Yamatai Star Empire](#).

## About Hyoutan

The Ice Giant Hyoutan and the moons that make up it's planetary system were discovered by the [Fifth Expeditionary Fleet](#) of the [Star Army of Yamatai](#) in [YE 29](#). The moons in this system are icy and rocky and for the most part, are uninhabitable without the protection of a dome. Like most worlds in the region, Hyoutan spent a short amount of time as part of the [United Outer Colonies](#) from [YE 30](#) to [YE 33](#) and then the [Lorath Matriarchy](#) from [YE 33](#) until [YE 39](#). Both factions attempted large scale terraforming projects on the moons of Hyoutan, however, it was determined that the average temperature of these icy worlds and the layout of the solar system made terraforming unfeasible. In [YE 42](#), when the system was reviewed by the [First Expeditionary Fleet](#) and the [Yugumo Corporation](#) those failed terraforming projects were halted and plans for future dome colonies were put into place.

Statistics for Hyoutan	
Type	Ice Giant
<a href="#">PAINT</a> Station	No
Facilities and Bases	No
Colony	No
Population	0
Moons	73

## The Moons of Hyoutan

The seventy-three moons of Hyoutan are diverse in size, they are geologically active terrestrial bodies covered in water or methane ice. For the most part, they have not been mapped or fully explored. The largest of which is called Hyousetsu which was the focus on the terraforming projects in the system that have since been shut down.

## Places to Explore or Salvage

Hyoutan and its moons have some interesting locations.

## Abandoned Lorath Terraforming Facilities

The [Lorath Matriarchy](#) had many terraforming facilities on the moons of Hyousetsu, all of which were abandoned in [YE 39](#). These facilities are in unknown condition and have not been explored or salvaged as

of [YE 42](#).

## Orbital Assets

The [Star Army of Yamatai](#) established a "[Guriddo](#)" [Defense System](#) as part of the Gensou System Defense Plan laid out by [Ketsurui-Motoyoshi Katsuko](#) in [YE 42](#). The system includes:

- 20 [Ke-H5-W3200 "Kyouheki" Defense Platforms](#) each typically controls two [Ke-H5-M3200 "Nesuto" Docking Platforms](#), but can handle more.
  - 10 [Ke-H5-M3200 "Nesuto" Docking Platforms](#) each with 18 [Ke-H5-W3201 "Suzumebachi" Attack Drones](#)
    - 180 [Ke-H5-W3201 "Suzumebachi" Attack Drones](#)

## OOC Notes
