

# Ronica - Biosphere

This page provides information on the noteworthy indigenous lifeforms on [Ronica \(Planet\)](#).

## Animals

### Hexies

[Ronica](#) is home to the *Hexies* a six-legged Mountain Sheep species. Their name came from shortening of their classification of Hexapedal Ovis. Home to the many mountain ranges of [Ronica](#). They are typically 120cm tall, and weigh 180kg. Found in herds of 2-100 animals.

The Hexies are also known for their exceptional quality wool.

### Wild Boar

The grasslands of [Ronica](#) are home to large version of Wild Boar. They are typically 240-360cm in length, 180cm at the shoulder, and weigh 160-250kg. Males typically are loners, and groups of up to fifty young males and females can be seen roaming.

## Plants

### Mineral Trees

A version of 🌲 [Cryptomeria](#), these trees have a unique attribute. They absorb large quantities of minerals from the ground, which makes their wood very dense. The wood has a stone like quality, and can be cut and polished. Even though it looks like stone, it has a natural fragrance. Mineral Wood is hard to burn, but it will if the fire is hot enough. The wood is a dark red color with varying shades of brown accents.
