An epic adventure focused on the crew of the [YSS Mazu\(1XF\)](#) and the [YSS Battle of Ayenee Capital City\(5XF\)](#) in the newly discovered [Kosuke Sector](#).

History

The History of Hinomaru Sunrises II:

Timeline Highlights:

- [Departure Of The Combined Colony Fleet](#)

Prelude - Natsukashii

In [YE 44.7](#), Before the crews of the [YSS Mazu](#) and [YSS Battle of Ayenee Capital City](#) officially formed, some of their future members gathered at [Jiyuu-jo](#) on [Taisho Ketsurui-Motoyoshi Katsuko's](#) Yacht, [The Dream of Taie](#). Their purpose was to share a meal and drinks together. [Albert Steiner](#) of the [Iron Company](#) and some of his associates joined them. However, the evening took an unexpected turn when a brief family dispute disrupted their gathering.¹⁾

Mission 1 - Our Point of Origin

In [YE 45.1](#), To mark the launch of the [Departure Of The Combined Colony Fleet](#), the crew of the [YSS Mazu](#) and selected members from the [YSS Battle of Ayenee Capital City](#) came together for a formal dinner. As they socialized and unwound, the fleet entered the [Kosuke Sector](#). Shortly after their arrival, they received a distress signal from an [Illionite](#) vessel that had crashed in what would later be called the [Sharie System](#).²⁾

Mission 1.1 - Just More Questions

In response, the [YSS Mazu](#) changed course and headed for the planet where the crash had occurred. They dispatched away teams and a field laboratory to the surface. Simultaneously, the [Iron Company](#) sent a team to help secure the crash site for further investigation. During their exploration of the crash site, they discovered the bodies of a species they later identified as the [Cemlae](#), as well as two [Advanced-Type Mishhuvurthyar](#) within the wreckage. [Taisho Ketsurui-Motoyoshi Katsuko](#) and [Taisho Shimizu-Motoyoshi Akina](#) (清水本吉明菜) joined the teams on the surface, and a briefing was held to

determine their next steps.

While [Taisho Shimizu-Motoyoshi Akina](#) (清水本吉明菜), [Shoi Motoyoshi-Ieyasu Daisuke](#) (泰佑), [Santô Hei Alina Shanui](#), and [Jacob Morris](#) were returning to the surface, a massive hydrogen cyanide storm erupted. This flammable and toxic liquid rain was ignited by ion bursts in the atmosphere, causing the shuttle with [Motoyoshi-Ieyasu Daisuke](#) (泰佑), [Jacob Morris](#), and [Iron Company](#) personnel to crash. At the same time, [Alina Shanui](#) and [Shimizu-Motoyoshi Akina](#) (清水本吉明菜) struggled to remain airborne. During this chaos, [Shosa Mikael Harris](#) discovered a deceased [Illionite](#) in what appeared to be the Captain's Quarters of the ship, while [Motoyoshi Tachiko](#) and [Makoto Mikratos](#) caught a glimpse of a living [Illionite](#) trapped within a compartment of the ship's bridge.³⁾
