

# HMS Fearless

One of the four initial models of Kretor-clas Scouts built by [Abwehran Imperial Yards](#) in AF 259, the HMS Fearless is registered as a scout vessel of the [Ersteflotte](#).

## Fearless in Roleplay

The Fearless plot ship was a combination of action/adventure with pauses in the fighting for character development purposes. Interaction was normally via [single posts](#) (SP), with occasional weekly [joint post](#) (JP). I would also recommend all participants to make wiki entries for their characters. It's an easy way to keep your character up-to-date and much more available to refer to when needed. As this is a small faction, we would invite all senior roleplayers to join. But new fresh faces are welcome too.

This is the first plot ship of [Matthew](#). This is also the first plot ship of [Nevaron](#).

## Fearless' History

One of four Kretor prototypes built in AF 259 (YE 29), the HMS Fearless was placed in one of the large bays of Weltraumflotte HQ as training for a crew began. Its intended launch is the first month of the fourth quarter during AF 259 (YE 30) and will be on a mission of exploration and diplomacy.

The HMS Fearless arrived in the Neue Jaspis System in AF 259. Whereupon landing a small investigative team was sent down upon the surface.
