

The International Station

The International Station is Open RP plot created in 2021 by [GM Rawolfe](#). The International Station is also known as [Pisces Station](#) that got used on various intergalactic conferences by various factions within the [Kikyo Sector](#). The station got moved after the [Kuvexian War](#) to [Xylar](#) as this star system is designated to be the most neutral and easy to reach star system for most factions.

While [Rawolfe](#) is designated as a [GM](#), he doesn't control anyone plot. The idea is that everyone is free to start an open RP and use the International Station as an RP location. Thought if you do tend to terrorize or even try to blow up the station, then [Rawolfe](#) might be required to be informed about it upfront. [Rawolfe](#) is basically taking the administrative piece on himself to give players of the SARP community a place to RP!
