History

YSS Emperor is a veteran battleship with a veteran crew. Her service began at the tail end of the

[Second Mishhuvurthyar War](#) and has since remained in service as one of the earlier built Sharies in the Star Army. Though she is old, she received a major refit in YE 35 following the Five-Year Review and returned to service by the end of the year.

While her time after the war has been relatively calm, in YE 39, she received transfer orders to the First Expeditionary Fleet to serve in what could only be a strike at the Empire's newest foe, the [Kuvexians](#).

YSS Imperator has docked up in [Hanako's Star](#) at the [Gemini Star Fortress](#) to take on supplies and crew while awaiting final assignment and combat orders.

RP History

Mission One: Star by Star:

Division Three and Imperator encounter a L'Kor fleet of considerable size while performing force reconnaissance of Kuvexian Space. The Imperator scrambled it's fighter wings and intercepted incoming bomber wings with high efficiency. Following a destruction of the bombers, Avatar Squadron made torpedo runs on a selection of L'Kor Battleships, disabling all of them with the help of the Imperator's main battery. After the mission, the Imperator's CAG left for reassignment to the YSS Ultimatum, the flagship of the division, in exchange for their CAG.
