Isolated Computer Pad

The Ks-G2-E3100 Isolated Computer Pad became available in YE 31. It was replaced by the Star Army Science Pad and Kit Type 43.

About the Isolated Computer Pad

- Organization Using This item: Star Army of Yamatai
- Type: Secured Computer System
- Nomenclature: Ks-G2-E3100
- Designers: Ketsurui Zaibatsu Research and Development teams, Star Army Research Administration
- Manufacturers: Kessaku Systems, Star Army of Yamatai
- Entered service: YE 31
- Price: 1,800 KS

Purpose

These computer pads run the *Kessaku OS* and are used for the following purposes:

- Developing and debugging new programs.
- Performing diagnostics upon computer systems with corrupted Kessaku OS.
- Interrogating other computer systems, to prevent aggressive software from infiltrating mainframes.
- Situations where portable super-high-speed data-churning and possessing is needed.

Description

These pads are blue-gray in color and contain a digital-touch display.

Dimensions

Height: .034 m (12 inches) Width: .457 m (18 inches) Depth: 2.54 cm (1 inch)

Features

Interfaces

- Power switch is located in the lower right corner of the pad.
- Touch display which covers the majority of the top surface
- Psionic Signal Control *Must be manually engaged from display.*
- Encrypted transmitter for connecting to PANTHEON or other Kessaku Systems computer systems. *Must be manually engaged and the user must have authorization.*
- Holograph projection screen which can be set to project a image up to the size of .81 m (32 in) wide
- Voice activated microphone
- Stereo speakers.
- Slot for data cubes on right side.
- Data port for cable connection to other computers on right side.
- Standard power connector for tie in to standard power outlets on right side.

Computer core

The heart of the isolated computer pad is a tiny, but advanced, quantum computer, with the same capabilities as the Armor Integrated Electronics System (AIES), capable of performing super-high-speed data-churning and possessing untold memory.

Power cell (Ks-G2-E3100pc)

The Ks-G2-E3100pc power cell of the ICP has sufficient capacity to allow continuous operation for 12 hours. The ICP can be put into standby to swap power cells. Cost: 150 KS
