

Isolated Computer Pad

The Ks-G2-E4200 Isolated Computer Pad became available in [YE 42](#).

About the Isolated Computer Pad

- Organization Using This item: [Star Army of Yamatai](#)
- Type: Secured Computer System
- Nomenclature: Ks-G2-E4200
- Designers: [Ketsurui Zaibatsu](#) Research and Development teams, [Star Army Research Administration](#)
- Manufacturers: [Kessaku Systems](#), [Star Army of Yamatai](#)
- Entered service: [YE 42](#) replaces the Ks-G2-E3100
- Price: 1,800 [KS](#)

Purpose

These computer pads run the *Kessaku OS* and are used for the following purposes:

- Developing and debugging new programs.
- Performing diagnostics upon computer systems with corrupted Kessaku OS.
- Interrogating other computer systems, to prevent aggressive software from infiltrating mainframes.
- Situations where portable super-high-speed data-churning and possessing is needed.

Description

These pads are blue-gray in color and contain a digital-touch display.

Dimensions

Height: .034 m (12 inches) Width: .457 m (18 inches) Depth: 2.54 cm (1 inch)

Features

The G2-E4200 has the following features.

- Ruggedized construction.
- Power switch is located in the lower right corner of the pad.
- Touch display which covers the majority of the top surface
- Psionic Signal Control *Must be manually engaged from display.*
- Encrypted transmitter for connecting to [PANTHEON](#) or other [Kessaku Systems](#) computer systems. *Must be manually engaged and the user must have authorization.*
- [Type 33 Star Army Communications Network Encryption System](#)
- Interrogation protocols and subroutines
- Holograph projection screen which can be set to project an image up to the size of .81 m (32 in) wide
- Voice-activated microphone
- Stereo speakers.
- Slot for data cubes on the right side.
- Data port for cable connection to other computers on the right side.
- Standard power connector for a tie into standard power outlets on the right side.
- Optional feature Anti-Gravity

Computer core

The heart of the isolated computer pad is a tiny, but advanced, quantum computer, with the same capabilities as the [Armor Integrated Electronics System \(AIES\)](#), capable of performing super-high-speed data-churning and possessing untold memory.

Power cell (Ks-G2-E4200pc)

The Ks-G2-E4200pc power cell has been upgraded to include induction charging. This system harnesses ambient  [electromagnetic](#) energy fields. When not in range of ambient energy fields, the power cell capacity will allow continuous operation for 36 hours. The ICP can be put into standby to swap power cells. Cost: 150 KS

Grav Module (Ks-G2-E4201pc)

The Ks-G2-E4201pc is an optional feature. It allows the ICP to float within a specified distance from the user. This feature was added to aid technicians who need to have their hands free to make repairs while using the ICP to diagnose or provide instructions. If inductive charging is not an option, the module will notify the user when power is below 25% to prevent damage to the ICP. Cost: 200 KS

OOC Notes

Authored by [Nashoba](#) December 30, 2019 Art work was created by Nashoba

Approved by [Syaoran](#) on 1/9/2020

Products & Items Database	
Product Categories	computers, electronics
Product Name	Isolated Computer Pad
Nomenclature	Ks-G2-E4200
Manufacturer	Kessaku Systems
Year Released	YE 42
Price (KS)	1 ,800.00 KS
