

Ke-M2-G2902 Nodal Fabrication Module

Similar to the fabrication rooms in Star Army ships, the [Ketsurui Fleet Yards](#) Ke-M2-G2902 Nodal Fabrication Module contains a host of femtomachines whom can, once commanded, emerge from the dorsal pack and manipulate matter as the sub-molecular level to form solid items such as clothing, simple utility items and such. The pack contains enough raw material inside to produce two-cubic feet of volume objects (cumulatively), but the femtomachines can harvest raw matter from their environment (1 minute per cubic feet from a solid) to then convert the material into another object. The femtomachines work poorly in a vacuum environment and are best kept within 2 meters of the module.

Entered service: [YE 29](#)

Products & Items Database	
Product Name	Nodal Fabrication Module
Nomenclature	Ke-M2-G2902
Manufacturer	Ketsurui Fleet Yards
Year Released	YE 29
