

Ke-M2-P2903 Hyperspace Fold Booster

Anchored on the dorsal and both shoulder hardpoints (which must be equipped with shoulder weapon mounts and be unoccupied) of the [Mindy](#), the [Ketsurui Fleet Yards](#) Ke-M2-P2903 Hyperspace Fold Booster provides the option of interstellar travel to the pilot. The Booster module, when used, leaves an obvious subspace trail which makes it a poor choice for stealth missions.

- Speed (Hyperspace Fold): 131,490c (0.25 ly/m). See: [Hyperspace Travel](#)
- Range: Maximum fold distance crossed in a single jump is 10 light years.
- Charge Cycle: The unit requires one minute to warm up and an additional 30 seconds for each light year the hyperspace jump will require. The unit has a 15 minute cool down before it can be safely used again.

Entered service: [YE 29](#)

Products & Items Database	
Product Categories	subsystems
Product Name	Hyperspace Fold Booster
Nomenclature	Ke-M2-P2903
Manufacturer	Ketsurui Fleet Yards
Year Released	YE 29
