

Type 41 Advanced Reconnaissance and Scouting Armor Accessories

The [Advanced Reconnaissance and Scouting Armor, Type 41](#), or Tarsa for short, can make use of a lot of power armour accessories from Yamatai's earlier suits – it is a rather modular and easily customisable suit that can take parts from various other SAOY gear for ease of repair.

Dorsal Hardpoint

The Tarsa can make use of the following accessories on its Dorsal hardpoint.

- [Tarsa Wing Pack](#)
- [Ke-M2-E3000 Leader Support Pack](#)
- [Ke-M2-G2902 Nodal Fabrication Module](#)
- [Ke-M2-G3200 Fusion Generator^{1\)}](#)
- [Ke-M2-P2900 Power Armor Teleportation Unit](#)
- [Ke-M2-P3000 Power Armor Teleportation Unit](#)
- [Ke-M2-P4003 Power Armor Teleportation Unit](#)
- [Ke-M2-W2704 Nodal Support Bit Launcher](#) *The Tarsa lacks a combined field system and as such the flight time of the drones is limited to what their internal battery can provide.*
- [Ke-M2-W2905-BPX Gauss Cannon Backpack Extension](#)
- [Ke-M2-W3000 General Equipment Pack](#)
- [Ke-M3-W3001 “Kalamari” Manipulator Arm System](#)

Shoulder Hardpoints

The Tarsa can make use of the following accessories on its Shoulder hardpoints.

- [Ke-M2-G3000 Shoulder Capacitor](#)
- [Ke-M2-P3001 Energy Cloak Shield Projector](#)
- [Ke-M2-W3900 Shoulder-Fired 20mm Gauss Cannon](#)
- [Ke-M2-W2905 Shoulder-Fired 50mm Gauss Cannon](#)
- [Ke-M2-W2906 Shoulder-Fired Missile Pod](#)
- [Ke-M2-W3001 Shoulder-Mounted Aetheric Pulse Cannon](#)
- [Ke-M2-W3902 Shoulder-Mounted Scalar Machine Gun](#)
- *Shoulder Weapon Mount: A mount can be installed over the shoulder hardpoint enabling a pilot to hang a rifle-like weapon on the armor's back.*

Forearm Hardpoints

The Tarsa can make use of the following accessories in its Forearm Hardpoints.

- [Portable Medical Scanner PMS-1M](#) *A version of the medical scanner that slips on like a bracer and does not interfere with the function of the [forearm mounted NSB system](#)*
- [Star Army Science Scanner, Type 31](#) *A version of the science scanner that slips on like a bracer and does not interfere with the function of the [forearm mounted NSB system](#)*
- [Ke-M6-W3405 Daisy Wristblade](#) *Is fitted to the underside of the forearm using a bracer mount to make the wristblade compatible with the Tarsa, does not interfere with the function of the [forearm mounted NSB system](#).*
- [Ke-M6-W2901 Pulse Energy Weapon](#) *Replaces the [forearm mounted NSB system](#) due to the need for a good power source.*
- [Ke-M6-W3406 Daisy Multipurpose Plasma Weapon](#) *Replaces the [forearm mounted NSB system](#) due to space requirements so that it does not make the forearm too bulky.*

Abdomen/Lower Back Modular Webbing

The Abdomen and Lower back of the Tarsa make use of a more robust version of the [Type 40 Plate Bearing Vest's](#) webbing system to enable various pouches and bits of rigging to be easily attached – there is a space on the bottom of it designed specifically to carry the [CFWEP Package](#) or [Star Army Butt Pack, Type 29](#).

Hip Hardpoints

The Tarsa's Hip Hardpoints are designed to store most SAOY hand-weapons in a hassle free way using a system based off the shoulder weapon mount that is commonly used.

Thigh Cavities

Taken from the [M6-2A "Daisy II" Planetary Power Armor](#) each thigh compartment is 350mm deep x 200mm long x 30mm wide and capable of accepting a variety of mounts used to hold ammunition used by the SAOY – usually large enough to hold a few magazines.

Thigh Hardpoints

The Tarsa's Thigh Hardpoints are thick plates designed to accept the following leg-mounted accessories.

- [Ke-M2-G3001 Leg Capacitor](#)

- Ke-M2-W2703 (WA-05) Countermeasure Augmentation Pods
- [Ke-M2-W2903 NSD Upper Leg Hangers](#)
- [Ke-M2-W2907 Countermeasure Augmentation Pods](#)
- [Ke-M2-W2908 Offensive Augmentation Pods](#)
- [Ke-M3-W2710 Mini-Missile Launcher Pods](#) (from [Ke-M3 Series "Kylie" Anti-Armor Power Armor](#))

Armors can also use [Space and Orbital Offensive Warheads \(SOOW\) Mini-Missiles](#) or [Space and Orbital Sensor Misdirection \(SOSM\) Mini-Missiles](#).

1)

the Tarsa boasts an impressive power system already and this is mostly used to power devices external to the armor that have a rather heavy power draw
