

"Guriddo" Defense System

The Guriddo Defense System is the latest in star system defense used by the [Yamatai Star Empire](#) and manufactured by [Ketsurui Fleet Yards](#). It became available in [YE 32](#). Some components of the defense system received upgrades in [YE 42](#).

About the Guriddo Defense System

The Guriddo has three components, Suzumebachi (*Wasps*) attack drones Nesuto (*Nests*) and Kyouheki ([Parapet](#)) defense stations that each serve a distinct function in the system.

History

The Guriddo (*grid*) Defense System was the result of a project to develop a new star system defense system. The initial concept was submitted to [Ketsurui Fleet Yards](#) by [Jalen Sune](#) in [YE 31](#) after witnessing the disastrous failure of the existing defense systems at several key star systems; such as [Nataria](#). The basic concept was to develop an aggressive defense system that could provide maximum destructive force, while minimizing the loss of life.
