

Standard Star Army Fabrication Area

Fabrication areas on [starships](#) of the [Star Army of Yamatai](#) are areas dedicated to construction. These areas typically are two or more decks tall, contain robotic arms, nanomachine colonies, matter-to-energy converters and refiners, and other implements of industrial construction. Each fabrication area is capable of building items such as power armor, vehicles, and torpedoes (but not organic materials) without having to collect external resources. Larger and/or more complex items take longer amounts of time to fabricate.

For a list of equipment used by the Star Army of Yamatai, see [Star Army Equipment](#).
