

Standard Star Army Power Armor Bay

The floor is a glossy, polished black and the walls are made of typical gray paneling. Specially designed racks and a mass of red straps and black buckles hang on the walls and ceiling where power armor would be if the ship is fully manned. From the door one can look out directly into space through the force field in the rectangular openings on either side of the ship. Gravity in this area is 1G. If the bays are going to be used for some recreational purpose, the ship has netting that can be attached to rings that line the interior about a foot inside from the force field; these nets prevent people and objects from accidentally being pushed, thrown, or stumbling into the vacuum.

Beginning in [YE 31](#), many [Star Army of Yamatai](#) power armor bays began to include rows of [Armor Storage Racks](#).
