Twenty-five	Cargo Bay

Cargo bay

The main storage for this module the [standard cargo area](#) is located on decks twenty-three through twenty-five.

Crisis Station

Due to the fact that research projects can sometimes go awry with dangerous results. This is basically a first responder station. Whose personnel are trained in fire fighting, damage control, and emergency medical treatment.

This facility provides the following:

- office space for the responders
- storage for emergency equipment

Dining Hall and Galley

This facility is located on deck fourteen; it provides a dining facility for the research workers.

Dining Hall

This is [dining hall](#) for the workers.

Galley

The is the [galley](#) where meals are prepared.

Laboratory Level

This module has seven two deck high levels dedicated to research labs. The levels are subdivided into eight sections. This gives the module the potential for fifty-six labs. Although some facilities require larger space in that case two labs will be combined.

Note: Each lab has its own self-contained life support system, tied into a [Hemosynthetic Conduit System](#). This is to prevent any possible contamination of the primary life support system.

Lounge

Located on deck fourteen this [lounge](#) is intended for the use of the researchers to take breaks.

Medical Center

This module features a medical center featuring both trained staff facilities and [Autonomous Medical Treatment Center](#) units that focus on emergency care. It is located on decks seventeen and eighteen.
