

# YSS Kōun

The YSS Kōun (NG-S1-469) is a recently commissioned [Plumeria Medium Gunship](#) serving in the [Star Army of Yamatai](#). It is home of the [YSS Kōun Plot](#) roleplaying campaign. Currently the ships are part of first fleet.

## History

The new pride of the Star Army Navy was the YSS Kōun commissioned in [YE 42](#).

The ship's first mission was under the wing of the [YSS Kaiyō II](#). The ship was tasked with providing support and to prove [Alastair Belmont](#) could be in charge of a ship of his own. Shortly after this mission, the ship and crew were released to run their own missions.

The first big assignment for this ship took place in [YE 44](#). The ship had been tasked to open a dialog with [Soon Bardo](#) who had showed to be a front runner at leading the [Kuvexian](#) in what use to be Yamatai space. Details of this mission can be found within this report, [here](#).

## Pre-Mission One

The Koun was called to action to assist with the rescue of the Norian people during operation Fireplace. The Koun mostly played a support role helping to move refugees to a safe haven.

## Mission One: The Haunting Past

## Description

If one was to rank ships within Star Army with regards to performance, the Koun would be in 1st or 2nd place. This is one of the defining themes for the operation of the ship. Crew with a strong desire to be the best would fit well on this ship. At times it may feel like a ship of misfits and this has to do with the operation targets of the missions. The missions do not always go to plan and can even be in conflict with Star Army as a whole. This is on purpose, designed to enhance character progression. One could say the Koun is not afraid to rock the boat of Star Command.

## Crew

Current crew working aboard the YSS Kōun. A flex goal of the Koun is to have a well mixed crew of different races. It is not required to select a specific race but more the GM will find a way to get said race

onboard the Koun.
