Originally named the Truth's Vengeance, the vessel was placed into mothball after the [Second Mishhuvurthyar War](#). The vessel was then renamed after it received intensive refit at Gemini Star Fortress in [YE 41](#) and assigned to Task Force 501. The Yukikaze's primary missions are deep strikes, infiltration/extraction of Giretsu Centuries, civil affairs, and escort/protection of dignitaries. It is currently assigned to [Task Force 501](#).

The YSS Yukikaze is the background for the [Banzai!!](#) plot.

History

The Yukikaze started its life as a freshly built ship from the Gemini Star Fortress by [Ketsurui Fleet Yards](#) in [YE 33](#). Named Truth's Vengeance at the time, it was briefly commanded by Shoi [Suzuki Akira](#) for its shakedown cruise. Afterward, command was given to Taii Watanabe and spent most of the war patrolling space far from the main action of the war. Shortly afterward, the ship was put into reserves at [Nataria](#) to reduce costs.

In late [YE 41](#), the now renamed YSS Yukikaze was moved out of reserves and underwent a modernization refit to bring it to the 2E standard. Completed in [YE 42](#), the YSS Yukikaze was assigned to the new Task Force 501 and configured to the [2E/R configuration](#). The [Giretsu Century of the 75th Legion](#) was attached to this ship as of the 4th month of YE 42.
