

Ke-S2-W3000 Main Weapon Array

The main weapon array for the [Irim-class Heavy Gunship](#). This state-of-the-art Transposition Flux Cannon transposes the space between two points, causing the space-time continuum of an area to collapse on itself. Ships using space-time anchors or dimensional screens are particularly affected by the TFC and are almost guaranteed to be dragged out of existence by their anchors, even when not directly in the path of the beam (500,000 miles). Deactivating the T/SA or DS will halt the ship's approach to the rift. This weapon's new second stage fills the path of beam with a river of quintessent “dark energy” to finish off any survivors by exploding them at the atomic level. Very nasty; not to be used when friendlies are on the business end of the weapon.

- Location: Forward weapons modules
- Primary Purpose: Anti-starship
- Secondary Purpose: Assault
- Damage: Total Annihilation over a 250,000-mile wide area
- Range: 20 through 450,000,000 miles (the beam cannot hit anything less than 20 miles from the ship)
- Rate of Fire: Once every minute.
- Payload: Effectively unlimited, so long as the ship provides power.

Date entered service: [YE 30](#)

Star Army Logistics	
Supply Classification	Class F - SYSTEMS WEAPONS ASSEMBLY MAJOR
Products & Items Database	
Product Categories	weapons: starship
Product Name	Ke-S2-W3000 Main Weapon Array
Nomenclature	Ke-S2-W3000
Manufacturer	Ketsurui Fleet Yards
Year Released	YE 30
