

Ke-S2-W3002 Missile Launchers

A remake of the WickedArms Corporation WA-06i Missile Launchers. These small semi-retractable missile launchers are located all over the hull. When not in use, the missiles are protected by launcher covers, and the launchers are mostly retracted into the hull in the form of small bumps. When in active use, they poke out like little towers.

- Location: Hull

Warhead: Subspace Detonator Missiles (SDM)

- Purpose: Creates holes in shield systems, disables FTL flight, collapses wormholes.
- Damage: No direct damage.
- Range: 500,000 miles
