

# Ke-S3-W3900 Main Weapon Array

The Ke-S3-W3900 is an [aether shock array](#) designed by [Ketsurui Fleet Yards](#) in [YE 39](#) for usage onboard the [Fuji-class Expeditionary Gunship](#). It is an experimental upgrade to the venerable [Ke-S3-W3020 Main Weapon Array](#) due to its compact and hull-integrated nature.

An [aether shock array](#) functions by emitting a powerful [scalar interference pulse](#) that creates a small rend in the fabric of space-time. When this occurs, all energy potentials in the target area are released into normal space simultaneously, causing horrific amounts of destruction. [Arrays](#) are typically designed for anti-starship or anti-fleet use.

Firing Mode	Purpose	Rate of Fire	Area of Effect	Range
Rapid Pulse	<a href="#">Tier 10</a> , Light Anti-Starship	60 pulses/minute	Single Target	149,000,000 kilometers
Beam	<a href="#">Tier 13</a> , Light Anti-Capital Ship	5 beams/minute	Single Target	149,000,000 kilometers
Spread	<a href="#">Tier 12</a> , Heavy Anti-Starship	2 spreads/minute	30° Cone	10,000,000 kilometers

149,000,000 kilometers is about 1 astronomical unit or 92,000,000 miles.

The array consists of a center firing node that takes up the entirety of the [Fuji's](#) forward “nose” section. The beam can be steered up to 45 degrees right or left, and up to 15 degrees upwards, but cannot fire lower than straight forward due to the weapon's arrangement.

The systems that comprise this particular weapon were built in a modular fashion so that may be upgraded or replaced in the future if desired; exchanging the main gun's systems in this fashion requires about 7 hours.

## OOC Notes
