

Nekovalkyrja Service Pistol, Type 27

The Type 27 NSP is a lightweight, rugged, and customizable energy weapon which can heavily damage both organics and metals through use of phased energy pulse technology to disrupt molecular bonds. It features an integrated laser sight, tactical flashlight, and a shots remaining display on the rear of the gun. No “iron sights,” however, are included. The grip is designed for a [Nekovalkyrja](#) standard 3-fingered hand and is made of either polished walnut, or a textured, slip-resistant rubberized polymer. Frame is made of advanced metal-ceramic. It includes a safety switch by the laser/light unit and also a safe mode on the selector switch. It should be noted that the laser and flashlight are powered by an internal battery that is recharged every time a new magazine is inserted. The internal battery lasts about 10 hours (using both the laser and the light) without magazine power.

- In pulse mode, pulling the trigger halfway fires a single shot. Fully pulling the trigger fires until the trigger is released. Only pulse firing can be used in automatic.
- The weapon's heavy mode expends 5 times as much energy, for a grenade-like effect.
- Stun mode fires a scalar pulse designed to temporarily overcome and disable the target's nervous system and works on both organics and electronics. Pulling the trigger lightly fires enough scalar waves to disable an average human without permanent damage. Pulling firmly fires enough to disable a [Nekovalkyrja](#).

The Type 27 NSP was designed by the Kyoto chapter of [SARA](#) in early [YE 27](#) at the request of Taisho [Ketsurui Yui](#). The Star Army needed a pistol capable of stunning as well as the normal lethal role, plus integrated accessories. The NSP replaced the [WickedArms GP-13 Pulse Pistol](#) in the Star Army of Yamatai's [Nekovalkyrja](#) Fleets as the standard sidearm worn with the uniform. It was primarily produced in [Kyoto](#), Yamatai, and on [Hoshi no Iori](#) from [YE 27](#) to [YE 28](#).

The Type 27 NSP was phased out in [YE 28](#) in favor of the [Nekovalkyrja Service Pistol, Type 28](#).

[Standard Product Nomenclature System](#): Ke-W1

BR-27 Battery Magazine

The Type 27 NSP is powered by a [Ketsurui Zaibatsu](#) BR-27 rechargeable battery magazine that contains enough power for 25 shots. It slides into the bottom of the pistol grip.

OOC Notes

Authored and approved by [Wes](#) on September 16, 2004 ¹⁾

Star Army Logistics	
Supply Classification	Class G - WEAPONS INDIVIDUAL SMALL ARMS
First Used	YE 27
Products & Items Database	
Product Categories	weapons: pistols
Product Name	Nekovalkyrja Service Pistol, Type 27
Nomenclature	Ke-W1
Manufacturer	Ketsurui Zaibatsu
Year Released	YE 27
Price (KS)	1,000.00 KS
DR v3 max	Tier 3
