

System P1-10 "Dejection"

System description

Sun Type	Red Dwarf
Celestial Bodies	1 Terrestrial, 1 Gas Giant, 2 Asteroid Belts
Current Occupants	IPG

The star system's primary use is for the Nepleslian Intelligence Pacification Group, who have a sizable basing and prison operation on the system's only habitable planet, known as Abjection. The star system is heavily guarded by the presence of four starbases, the [Star Military Intelligence Pacification Group Naval Detachment](#), a small detachment of regular Navy warships and the 140 [Na-S/S-04a Rook Automated Defense Platform](#) stations in place. Also in place are a high number of interdiction field generators, with an effective radius of 20 AU, essentially locking the system from Hyperspace fold travel. Vessels entering within .5 Lightyears will be prompted for authorization codes and warned that unauthorized vessels will be destroyed. If proper access codes are not provided, any ship entering one quarter lightyear of the system will be targeted for extermination.
