

EX-8 "Euthalia"

One of the last systems to be surveyed for possible expansion by the [Elysians](#) before fighting broke out once more, EX-8 (called Euthalia) was deemed a very positive location for expansion, with one planet ready to be colonized as it was, and another potential colony available with only minimal atmospheric terraforming.

As the [Second Mishhuvurthyar War](#) dragged on, and the fighting drew closer and closer to [Veritas](#) and [Elysia](#) itself, the decision was made to evacuate the majority of the remaining populace to a new location, away from the war zone, and Euthalia was selected as the best option. With the colonization efforts well underway on [Katoikiapon](#), the atmospheric change process on [Crucis](#) was started in preparation for the near exodus of the Elysian people.
