

Degonjo Saeruo (Hidden Sun System)

This system is located in a large nebula about 60 light years south of [Yamatai Star System](#). The [Poku Saeruo Degonjo](#) refer to the nebula as the [Siam Rya \(Soul of the Divine\)](#).

It is a binary star system, the companion of which exploded some 700+ years ago. When it did it laid waste to the planets.

Star: Ida Siamaka (Eye of God)

This is what is left of the companion star that survived when the primary exploded and formed the nebula. It is a cool [brown dwarf](#) that has intermittent increases in emissions due to a core instability.

Sotâka Ruomâqi (World Station)

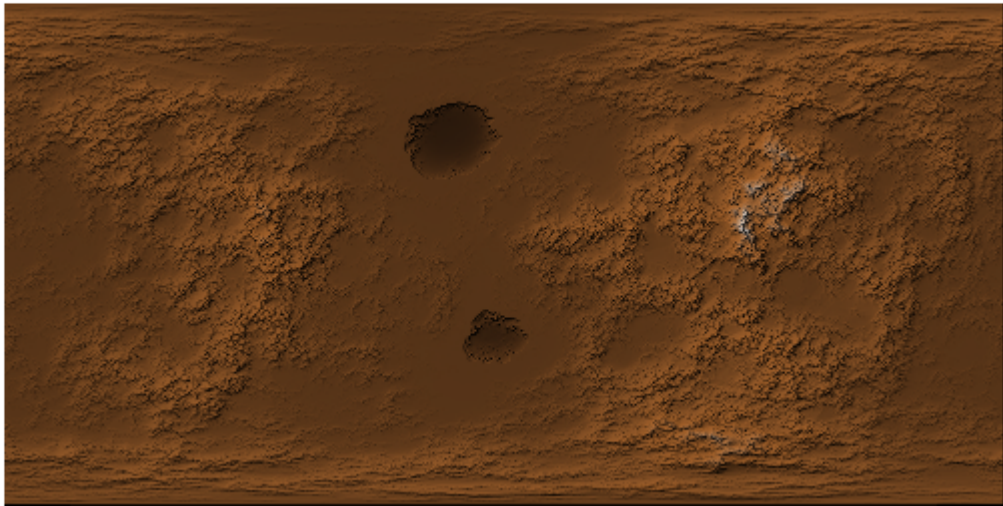

The [Sotâka Ruomâqi \(World Station\)](#) is located 1 AU from the star. The Sotâka Ruomâqi is the main habitat of the clan, capable of housing more than 1 billion [Poku'vonai](#).

Poku Movi Vamâqi

The [Poku Movi Vamâqi \(Clan Void Berth\)](#) orbital facility maintains a position .25 AU from the Sotâka Ruomâqi. It is the Hidden Sun Clan's shipyard and research facility.

Ikâtue (Rock)

This is one of the original planets of the system. The atmosphere was stripped away from the planet by the nova. The Clan found it while exploring the nebula and moved it into a more advantageous position. The [Poku'vonai](#) have erected a series of large interconnected domes on the planet for specific purposes. Carbon dioxide snow can be seen on the peaks of some of the mountains.

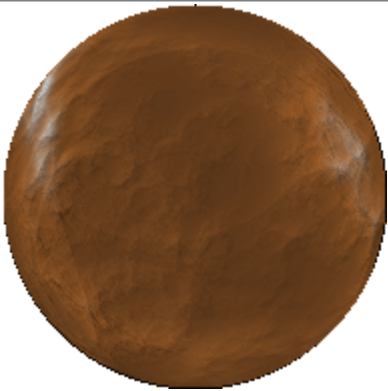

Tabak'ka (Great Preserve)

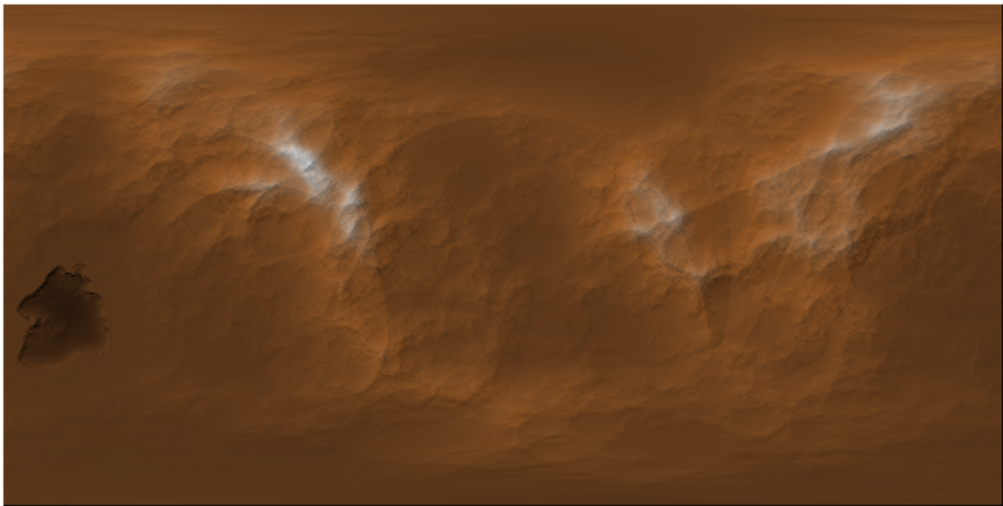

Is a large facility that the clan uses to raise predator creature they have found on other worlds. It is a place where a warrior from the [Tavi Fua Jael \(Blood Tooth Sect\)](#) must survive for 1 cycle (36 hours), with only a [Kâbo Veltin \(Task Blade\)](#).

The Pens

This dome is a farming facility, it is overseen by the [Veltin Usapo Jael \(Swift Knife Sect\)](#). The work is done primarily by the [Tula](#), the other species from the home world. Most [Qaktoro](#) members considering the working of plants beneath them.

Wunyaka

A another small barren planet without any atmosphere. Carbon dioxide snow can be seen on the peaks of some of the mountains. There are two underground storage facilities are created. It was called Wunyaka (*Great Container*)

Cache

This is where the Clan stores items it can not use at the moment. The items are stored based on their classification.

- Raw materials - construction materials that are stored until they are needed for projects.
- Useful components - this includes technological components that the clan has learned how to use, or even salvaged items of their own technology.
- Offal - This is where salvaged items that can not be processed or devices they can not use or recycle.

Offal

This is where salvaged items that can not be processed or devices the clan can not use or recycle.
