

System P1-7 "Malaise"

System description

Sun Type	Yellow Dwarf
Celestial Bodies	3 Terrestrial, 1 Gas Giant, 1 Asteroid Belts
Current Occupants	Nepleslians

The star system's primary planet, "Half Empty" is to provide low-income families on Nepleslia Prime a cheap place to stay, as well as to provide work for the jobless of Nepleslia. The primary jobs on the planet are manufacturing of SMO DIN weapons and equipment, and there is a sizeable manufacturing plant for starships being build. The planet itself is slightly too far from the sun, causing it to have a very cold temperature around the whole planet. (Even the middle of the planet, where most of the sun's rays are caught, averages at about 50 degrees in the summer.)

The 3rd Assault Fleet of the [Star Military of the Democratic Imperium of Nepleslia](#) maintains patrols around Half Empty.

Cultural Information

While most aspects are taken from Nepleslia itself, Malaise is known to be rather independant, almost to the point of isolationism. They are generally distrustful of people from other systems, and to foreign species they are even more so, often refusing them passage to any of the planets and sometimes forcing them to take an alternate route to their destination. The black market thrives in this area, and there are even rumors that the local governments have heavy ties to it.

Political Information

Malaise is politically affiliated with the Greens, being their colonies and all, but they still tend to do things on their own. They will not however deal with Reds, and very rarely Yamatai. In addition to the Manufacturing plants, a couple have their own labs where Malaise carries out its own research on the combination of different species. Malaise even associates itself with pirates, but only for the purposes of the black market and the money gained from it. Any hostilities or raids conducted within Malaise space will be retaliated to harshly.

In-system Assets

- 015 NAM Manufacturing Plants
- 001 NAM Starship Manufacturing Plant

Under Construction

- 1 Metropolis
- 003 Cities
- 009 Towns

Terrestrial World: Purgatory

Physics

Type	Two Continents, Numerous Frozen Seas. Frozen glaciers at either poles.
Radius	8684.48 km
Surface Area	1.02 x 98 km ²
Land Area	1.98 x 139 km ²
Mass	1.87 x 955 kg
Density	5.40 g/cm ³
Composition	33.3% iron, 24.7% oxygen, 6.25% nickel, 13.6% silicon, 11.56% other metals, trace other elements

Climate

Climate Types	Snow, Rain, Hail. Extremely frigid.
Flora Density	Very low.
Fauna Density	Very little.
Length of Day	Twenty Nine hours.
Average Temperature	Temperature on the planet ranges from -10-40 degrees. Snow is common in colder temperatures, and the north and south poles of the planet are covered in glaciers.

Population

Half Empty is primarily made up of Nepleslian citizens.

Capitol	Half Empty Mega Cup
Demographics	Nepleslians, NAM personnel

Other

Malaisian Enforcers

Places of the SARPiverse	
Place Categories	star system
