

# UX-HB-3 'Refuge of Sinners'

[Uesu's Fleet](#) passed through this system circa [YE 30](#) and left behind signs of a battle, including a derelict [Ayame-class Cruiser](#). The [I'ee](#) explored the system and labeled the wreck as too dangerous to investigate years later, and the lonely system was otherwise undisturbed until the [YSS Heartbreaker](#) returned in [YE 38](#) while following Uesu's trail. They discovered that the crew members on board the cruiser had been infested with [Parasite-Type Mishhuvurthyar](#) who had then taken control of the ship. Uesu used his overrides to leave the ship powered down and immobile, then left a prototype combat android on board to gather data on its effectiveness as an anti-parasite weapon. The cruiser was later recovered by Star Army forces.
