

Characters Schema

The characters schema is probably Star Army's most important [Struct](#) schema and applies to all [character](#) pages in the correct [namespaces](#) (excluding [WIPs](#)).

Namespaces Assigned

The characters schema is assigned to the characters namespace.

- `characters:**` (2993 pages)
 - this includes all sub-namespaces such as `characters:yamatai:`

Columns

Columns you can use are:

- `owner`
- `character_name`
- `character_clan`
- `status`
- `character_gender`
- `character_species`
- `character_relationship_status`
- `character_faction`
- `character_occupation`
- `character_organization` (multi page field)
- `character_location` (lookup to places)
- `character_home` (lookup to places)
- `character_plots` (multi lookup field from pages in plots)
- `character_image`
- `character_image_headshot`
- `character_image_chibi`
- `character_theme_music`
- `character_npcable`
- `character_approval_url`
- `character_adoptable` (means: is the character adoptable after the player gone for a year?)
- `birth_date`
- `birth_month`
- `birth_year` (lookup to the [Years Schema](#))
- `birth_place` (lookup to the [Places Schema](#))
- `character_notes`
- `character_art_request`

- character_hair_color
- character_eye_color
- character_skin_color
- character_height
- character_weight
- character_harm_limit_pref

Example: List Your Characters

This example is a list of characters from one player that is searchable and has multiple pages if there's more than 25 results.

```
---- struct table ----
schema: characters
cols: character_image, %title%, character_plots
filter: owner = members:wes
order: %title%
csv: 0
dynfilters: 1
rownumbers: 1
max: 25
----
```

Example: All Characters In A Location

```
---- struct table ----
schema: characters
cols: character_image, %title%, character_occupation, character_gender,
character_species
filter: character_location = places:ternifac
csv: 0
----
```

Example: All Characters In A Plot

```
---- struct table ----
schema: characters
cols: character_image, %title%, character_occupation
filter: character_plots = plots:your_plot_page
csv: 0
----
```

Automated Info Box

```
^ {{${characters.character_name}}} ^^  
| {{${characters.character_image}}} ||  
^ Species & Gender | {{${characters.character_species}}}  
{{${characters.character_gender}} |  
^ Organization: | {{${characters.character_organization}} |  
^ Occupation: | {{${characters.character_occupation}} |  
^ Current Placement: | {{${characters.character_location}} |
```
