

Links Schema

The *links* schema is a global [struct](#) schema (meaning it's not attached to pages) that's used to classify links to other websites and webpages that are useful to Star Army members. It's used to populate the site's [links section](#).

There is also a *link_category* schema which is solely used to populate the categories of links.

Columns in Links

Columns in the links schema include:

- `link_url` (URL)
- `link_title` (Text)
- `link_categories` (Lookup to Links_Categories)
- `link_description` (Text; currently disabled and not used)

Columns in Links_Categories

- `link_cat_name`

Updates

Wes updates the link list using this page: [Link List Management Page](#). You'll have to talk to Wes if you have a to suggest a link or update a link.
