

Expeditionary Fleet Supply Chain Program

The Expeditionary Fleet Supply Chain Program was developed by [Ketsurui-Motoyoshi Katsuko](#) with support from [Star Army Logistics](#) in [YE 41](#). The program will provide suggestions to [Star Army Logistics](#) for a large scale improvement to the supply chain protocols and assets currently utilized in the [Star Army of Yamatai](#). The program was designed to be implemented in the [First Expeditionary Fleet](#) and if successful and approval would become the standard for the Expeditionary Fleets.

XFSC Program Overall Objectives

The war with the [Interstellar Kingdom Of Kuvexia](#) has applied pressure on [Star Army Logistics](#). The war is expected to increase the distance and duration of deployment, as well as increase actual combat time, which may compromise fleet resupply and integrated fabrication strategies.

The XFSC Program will:

- produce new logistic ship classes and equipment. (farming, factory, etc)
- repurpose existing equipment.
- help modernize the logistics protocols of the [Star Army of Yamatai](#).

The program satisfy the [Expeditionary Fleet Mission Profile](#) through the testing and implementation of new technologies.

XFSC Headquarters

Headquarters for the new XFSC would be based on [Gemini Star Fortress](#).

Oversight and Reporting

The program's originator, [Ketsurui-Motoyoshi Katsuko](#), will oversee the early stages of the program reporting to [Star Army Logistics](#) and [Ketsurui Yui](#), if adoption of improvements extend beyond the [First Expeditionary Fleet](#), oversight will be managed by [Star Army Logistics](#).
