

Outer Belt Listening Cluster

WIP: This article is a work in progress.

A series of twelve [Listening / Supply Posts](#) located in the Outer Jaspis Belt responsible for monitoring all Hyperspace Travel arriving and leaving the system. Each Asteroid Base is spread out across the belt at an orbital radius of approximately 153.75 AU and are responsible for any last minute resupply emergencies and/or refueling vessels need.

In fact, the Outer Belt Listening Cluster is comprised of the only asteroid bases open to civilian vessels, which makes them not only vital to the defense of the [Jaspis](#) system, but also vital to trade as waypoints and customs stations.

Cardinal Waypoints

The Cardinal Waypoints are the four largest [Listening / Supply Posts](#) in the cluster and see the highest amount of traffic.

Celestial Data

- Type: [Class V Asteroid](#)
- Orbital Radii: 2.30×10^{10} kilometers at [Semi-major Axis](#)
- Mean Diameter: ~100 kilometers

Stationed Forces

To Be Created

Resupply Efforts

To Be Created

Axis Waypoints

The remaining eight [Listening / Supply Posts](#) are smaller than the Cardinals and are evenly spaced between the four larger Posts. While they do not deal with the amount of traffic the Cardinals do, they are still vital to trade and defense.

Celestial Data

- Type: [Class V Asteroid](#)
- Orbital Radii: 2.30×10^{10} kilometers at [Semi-major Axis](#)
- Mean Diameter: ~ 30 kilometers

Stationed Forces

To Be Created

Resupply Efforts

To Be Created
